Dimension One Spas

Dimension One Spas was founded in 1977 in Vista, California and is still the largest privately held spa manufacturer in the world. D-1 has the industry reputation of manufacturing the most sturdily built spa products on the market, as well as the most heavily insulated spas.

The hydrotherapy offered by D-1 is second to none, and the water management is provided by a patented state of the art system, meaning no chlorine residual is required. Because of the way they are constructed, Dimension One Spas will outlast any other spa on the market today. It is not uncommon for us to see spas approaching 20 years old and longer still providing excellent service.

Visit the D-1 website to view the 3 full lines of spas available: Bay Collection, Home Hot Tubs, Reflections and Aquatic Fitness Systems at <http://www.d1spas.com/hot-tubs.html>

The Californian seats up to 6 people with multilevel, barrier-free seating and a High-Performance Lounge. Other features include the optional Stereo and Liquid FX that add a unique audio-visual dimension to your hydrotherapy experience.
